

# Gas leak detection and odorization

## YOUR CHALLENGES

**Ensure the safety of your gas infrastructure with a reliable approach to leak detection and gas odorization practices, in compliance with regulatory requirements.**

### OUR VALUE-ADDED SKILLS

- Development of gas leak detection means and test protocols to qualify these means.
- Expertise in gas odorization: regulations, odorization practices around the world, odorant analysis, olfactometry and odor perception.
- Test benches in analysis laboratories, with a wide range of carrier gases (helium, hydrogen, nitrogen, methane, network natural gas, reconstituted air, compressed air, hydrogen, etc.)
- Qualification of natural or renewable gas leak detection equipment.

### OUR REFERENCES

- Evaluation of portable methane detectors, for vehicles, for drones and for personal protective equipment.
- Evaluation of the technical performance of odorization skids for biomethane
- Watch on methane detector sensors.
