

Hydrogen risk awareness

YOUR CHALLENGES

To understand the operation of hydrogen structures, thanks to a day of awareness of the safety issues associated with this fluid combining theory and practice.

OUR VALUE-ADDED SKILLS

- Awareness day developed with the CNPP, an expert in risk prevention and control
- Morning of theoretical contributions: introduction to the hydrogen sector; characteristics of hydrogen and comparison with natural gas; accidentology, feedback and regulations; phenomenology of flight and dispersion; Phenomenology of hydrogen inflammation
- Afternoon of practical contributions: demonstration of dangerous phenomena, hydrogen flame detection, and the conduct to be taken to intervene; Role-playing exercise for the trainees (search for flaming leaks and safety of the facilities).

LOCALIZATION

Awareness-raising sessions are being held at the sites of Alfortville (Val-de-Marne) and Vernon (Eure), and soon in Fos-sur-Mer (Bouches-du-Rhône).

OUR REFERENCES

More than 400 people made aware of the teams of gas transmission and storage system operators between 2021 and 2024.

THEY TRUST US

PRICE OF THE SERVICE

Session given for a group of 4 to 10 people, at the price of €1,250/person. Contact us to specify your needs
