

# Modeling and optimization of the management of your networks

## YOUR CHALLENGES

**Optimize the sizing and management of your energy infrastructures, thanks to our skills and decision-making tools.**

### OUR VALUE-ADDED SKILLS

- Design of models, algorithms and development of operational decision-support software bricks
- Realization of dynamic simulation studies to estimate the feasibility and adjustment of countdown stations at transmission-distribution interfaces.

### OUR REFERENCES

- Optimization of operating costs and management of intraday flexibility
- Assistance with the operation and dimensioning of distribution networks
- Optimized sizing of the network for the arrival of new gases (biomethane, H2)

### THEY TRUST US

### PRICE OF THE SERVICE

Tailor-made service adapted to your industrial characteristics.  
Contact us to specify your needs and receive a personalized offer.
