Moovilys, a mobile application for inspecting your industrial infrastructures

YOUR CHALLENGES

Facilitate the management of your technical inspections and create standardized, historized and reliably recorded reports in a single computer repository.

OUR VALUE-ADDED SKILLS

- Facilitation of technical inspections of singular points of the network with local photography of anomalies observed, generation of inspection reports and historization of successive inspections.

- Application installed on a tablet or smartphone, used in the field, interfaced with an external camera and attached to a telescopic and articulated pole.

- Hosting inspection reports on a cloud that can be accessed from anywhere.

- Simple and ergonomic handling, without any prior training.

OUR REFERENCES

- Creation of a follow-up of standardized infrastructure inspection reports for all teams, and measurement of temporal evolution.

- Detailed illustration of the inspections with photos taken in the field,

- Historization of successive inspections in order to manage an efficient asset management process.
